

MINUTES: DIVISION MEETING

NATURAL SCIENCES & MATHEMATICS

FEBRUARY 22ND, 2008

Present: Teresa Minter-Procter, Cindy Pummill, Jeff Gervasi, Joel Wiens, Rickelle Syrdahl, Stewart Hathaway, Miguel Ruelas, Richard Goode, Jon Satko, Sherie Burgess, and Terry Crewse

[1] Reports were briefly presented from the division chairs committee (Jeff), the Curriculum Committee (Jon), and the Facilities Planning Committee (Joel).

[2] The rest of the time was spent working on student learning outcomes. This work began with a presentation by Rickelle Syrdahl, a member of the Student Learning Outcomes Committee and division member, followed by questions and answers. After the presentation, the math professors split from the science professors so both groups could discuss student learning outcomes unique to their respective disciplines.

[3] The math professors will meet every Friday afternoon to discuss their progress until the course outlines and corresponding SLOs are completed.
